EXPERIENCE

NTT Ltd, Bangalore *- Full Stack Developer,* (https://services.global.ntt/)07/2021 - Present
- Built a real time project period of Q1 on "Uptime and SDI Base".
- Technologies: HTML5, CSS3, JavaScript, MongoDB, Angular, Graph-QL.
- In this we create SPA for multivendor (Cisco, F5, Aruba, Palo Alto), allows user to complete what Multivendor has within its in various product offerings. By adding this capability, we improve on the value we able to bring to the client. The client will have the capability to view their complete Multivendor licensing estate from within a single portal. This will also allow us to develop the client view on Portal V2 platform, further enhancing the client UX.

- Built a real time project period of Q1 on "SDI Premium".
- Technologies: HTML5, CSS3, JavaScript, MongoDB, Angular, Graph-QL.
- In this we create SPA for Data Center and Campus Network, allows user to complete what Data Center and Campus Network has within its in various product offerings. By adding this capability, we improve on the value we able to bring to the client. The client will have the capability to view their complete Data Center and Campus Network, licensing estate from within a single portal. This will also allow us to develop the client view on Portal V2 platform, further enhancing the client UX.
